## SUMMARY

Computer Engineering student and Python Django Developer skilled in back-end development, API integration, and database optimization. Dedicated to delivering clean code and innovative web solutions. I am eager to contribute to a forward-thinking company by providing expert development solutions and innovative technical strategies.

## PROJECTS

### Community Platfrom Website

Feb 2023

- Developed a Django-based community platform with user authentication, posts, and realtime chat functionality
- Deployed the application on Python Anywhere for public access.

<https://backgate.pythonanywhere.com>

### Steganography Project

Nov 2024

- Developed an API and a site using Django\_rest\_framework.
- It can hide messages in images in secure and imperceptible manner.
- Deployed the application on Python Anywhere for public access.

<https://visioncrypt.pythonanywhere.com>

### Portfolio Tracker

July 2024

- Automated tracker for your meroshare portfolio , includes charts and daily report.
- Executes constantly in github using github actions.
